

DEK Precision Swabs

ASM Assembly Systems' DEK Precision Swabs are designed, manufactured and packaged to provide high quality, economical solutions for various cleaning and maintenance requirements in SMT and clean room applications, or anywhere that cleaning is directly related to accuracy.

DEK Precision Swabs have swab tips that are heat-sealed to the handles to avoid contamination and material compatibility issues associated with many adhesives. The materials have been selected to provide the best flexibility and durability.

Foam Swabs

The Foam Swab is an excellent general-purpose swab for cleaning small and confined areas. Its laundered foam head possesses good absorbing capacity and cushioning. A compact, rigid handle and round internal head core provide firm support.
