

Small, strong & intelligent!
• The **i-CON[®] nano**
packs a punch!

The new ERSA soldering station saves space and costs - at full power!

- Small footprint (145 x 80 mm) – saves valuable workbench space
- Fully antistatic according to MIL-SPEC/ESA standards
- Three fixed temperature settings or continuous from 150 up to 450 °C
- Three selectable energy levels
- Ultra light and ergonomically designed *i-Tool nano* with over 68 W of power
- Large spectrum of low-cost & long-life replaceable tips
- Automatic stand-by function and non-operative mode saves energy & tip life
- Password lockout function for increased process control
- Calibration function for exact tip temperatures
- Complete system parameterization via simple PC software and micro SD card
